EXPERIENCE

Cape Property Pros

June 2025 – Present

Software Engineer

Dennis, MA

- Built automated data pipelines in Python integrating multiple APIs (Gmail, QuickBooks) with PostgreSQL, processing **500+ records monthly** with async batch operations
- Designed ETL workflows with schema validation and automated error handling, ensuring data integrity across 3 disparate sources used by multiple team members
- Implemented fuzzy matching and deduplication tooling achieving **90%+ accuracy**, reducing manual data reconciliation across the organization

PROJECTS

Real-Time Streaming System | Python, Rust, asyncio, WebSockets | [GitHub](#)

- Built real-time data streaming system with Python asyncio backend managing **50+ concurrent WebSocket connections** with automatic reconnection and fault recovery
- Designed dual-language architecture: Python for network integration, data processing, and system orchestration; Rust for low-latency real-time display at 60fps
- Implemented monitoring and health-check infrastructure to detect connection drops and trigger automated recovery across all active streams

InkVault | Python, FastAPI, scikit-learn, AWS, Docker | [GitHub](#)

- Built document processing pipeline with structured output parsing, JSON schema validation, and automated classification achieving **94% accuracy**
- Deployed on AWS Lambda with S3 and DynamoDB; implemented infrastructure-as-code patterns and automated deployment workflows with Docker

RAG System | Python, FastAPI, ChromaDB, Docker | [GitHub](#)

- Built multi-component system with FastAPI backend, vector database, and real-time streaming via SSE, delivering responses with **sub-200ms latency**
- Designed modular service architecture with independent components for data ingestion, processing, and retrieval, enabling flexible testing and iteration

OPEN SOURCE

CutePetsBoston | Code for Boston

Dec 2025 – Present

- Migrated REST API integration from v4 to v5 endpoints, implementing data validation and preprocessing workflows for **200+ records monthly**

EDUCATION

The University of Chicago

June 2025

Master's Degree

Chicago, IL

Kenyon College

May 2024

Bachelor of Arts, Economics and Chinese Language and Literature

Gambier, OH

SKILLS

Languages: Python, Rust, SQL, Bash, TypeScript

Systems & Infrastructure: Linux, Docker, asyncio, WebSockets, REST APIs, FastAPI, CI/CD, Git

Data & Storage: PostgreSQL, DynamoDB, S3, Pandas, NumPy, scikit-learn, ETL pipelines

Cloud & Operations: AWS Lambda, automated deployment, monitoring, system integration, debugging

ATHLETICS

NCAA Division III Swimming – Kenyon and UChicago

5x National Champion, 5x First-Team All-American, 3x Scholar All-American, US Open Qualifier
